Overview

The *Greenprint Denver* Environmental Training Program (ETP) consists of training events that are required by regulation or City agencies and optional events that are provided by CCD. The events in this catalog consist only of those events for which a formal training event exists and do not address on-the-job training that is performed as a part of routine operations, unless such training is specifically mentioned in an enforceable document (such as the Air Quality Permit's O&M Plan). The training events presented herein follow from the requirements identified in the Legal and Other Requirements section of the GPD Environmental Management System or as part of the job requirements of a particular job classification. Additional training events will be added as required, following the template located in this document.

The CCD-wide Training section below includes trainings that affect multiple departments (not necessarily required of all departments). Department-specific trainings follow below.
