Meeting: Coordination with CDOT environmental staff

Date: 11/15/06 - 1:30 PM

Attendees: Jason Longsdorf (CCD), Kirk Webb (CDOT), Elizabeth “Lizzie” Kemp (CDOT), Tracey MacDonald, Mike Gill

A meeting was held between City and CDOT staff to brainstorm procedural options and implications for how to start the Environmental Assessment (EA) document for South Broadway once the Valley Highway Final Environmental Impact Statement (VHEIS) process is complete and the Phase 1 Record of Decision (ROD) signed.

While no conclusion or direction was identified as the best way to move forward, some of the ideas discussed were:

- Making the VHEIS preferred alternative part of the South Broadway No-Action alternative
- Fully evaluating the VHEIS Phase 6 option as a build alternative in the South Broadway EA.
- Fully evaluating the VHEIS Phase 6 option as a planning alternative under “linking planning and NEPA”

After the VHEIS Phase 1 ROD is signed, more discussions will be held with FHWA and the VHEIS team.

Meeting: Discussion with Platt Park People’s Association

Date: 11/16/06 - 9:00 AM

Attendees: Shelly Waters, Sharon Withers, Jim Lindbergh, Jason Longsdorf, Mike Gill

At the request of Platte Park People’s Association (3PA), Jason Longsdorf and Mike Gill met with the 3PA representatives to review the Consensus Alternative and some of the reasons for the final decisions. The discussion focused mainly on clarification of how and when parking would be installed on Broadway and on the “trigger language” and its implications.

Members of the South Broadway project team are available to meet with any of the consensus committee members or their organizations to discuss questions or concerns their organizations may have regarding the South Broadway Consensus Alternative.

LEVEL 3B BROADWAY WIDENING

- The alternative agreed to at the 10/19 CC meeting is now on the project web site.
