

NOTES:

1. Curb Head is to be poured separately from alley at locations as determined by the Engineer.
2. Place No. 4 Deformed Bars @ 12" on center as directed by the Engineer.
3. If the curb height is 6" or under, no rebar is required.
4. For $H > 2'-0"$, a retaining wall design is required.
5. Jointing should be consistent with alley pavement joints.
