Application for Permission to Design, Plan, Construct, Reconstruct or Remodel a
<u>Private</u> Improvement (Sewer)

To: Public Works Plan Review Services
201 W. Colfax Ave., Dept. 202, Room 2.H.10
Denver, CO 80202-5330

Date _____

I understand that this Application is required for the construction of private on-site systems which provide sewerage and/or drainage service inside the City. I hereby make application to perform the following private improvement work:

Description and Location of Proposed Work Including Public Works, DES Project Number

DES Project No.: _____ Project Title: _____

Project Location: _____

Construction Cost Estimate (including field observation and As-Built preparation) _____

For each of the following, give the name, address, and telephone number of the responsible Colorado registered Professional Engineer (P.E.), the Colorado registered Professional Land Surveyor, as applicable, and the construction inspection firm.

Construction Plans:	**Construction Inspection:**
As-Built Plans:	**Construction Surveys:**

I agree that all costs incident to this work shall be borne by me, including final inspection and other engineering services rendered by Public Works, DES. Monitoring of the project by Public Works, DES will be for the purpose of assuring general compliance with the approved plans, standards, details, and specifications as well as the *Rules & Regulations*. DES Construction Engineering for Storm and/or Sanitary inspection shall not take the place of construction inspection and materials testing, which is my responsibility.

I shall have a construction inspector on the job site at all times sewer or drainage facility work is performed to assure compliance with the approved plans, standards, details, and specifications of Public Works. Construction observation shall either be performed by or shall be supervised by a P.E. who shall certify that field inspections/observations were performed and that all work is installed and is in substantial compliance with the approved Private Construction Drawings and Public Works specifications. Additionally, a P.E. shall certify the "As-Built" drawings accurately depict the final installation of the private system.

I agree that, should the permitted construction activity result in a real or imminent sewer line stoppage or hazard causing or threatening the health or safety of the citizenry, the Department of Public Works may take any and all such actions to relieve the stoppage and I, the owner, shall pay the cost of such action. I further understand that, should I disagree with any such action, I may appeal the matter as allowed by DRMC 56-106.

I further agree to guarantee (warrant) any public storm sewer improvements associated with this project for a period of three (3) years after completion of the work and approval and acceptance by DES. I agree to the conditions under which this permission may be granted as defined in the aforesaid DRMC sections and *Rules and Regulations* and agree to provide acceptable "as-built" drawings of the work prior to acceptance by PW DES or commencement of the guarantee (warranty) period.

Once the private on-site construction plans are approved, DES Construction Engineering shall be contacted at (303) 446-3722 to obtain the approved plans and/or to schedule a Pre-Construction Conference for the sewer project, if applicable.

I understand that:

- All work shall be done by a properly licensed Plumbing Contractor or Sewer Contractor and that all work (lines, manholes, underdrains, inlets, etc.) will be inspected and approved by WMD. Installation shall conform to the Department of Public Works' standards regarding workmanship and materials, to include the use of Class B bedding material conforming to ASTM C-33 or ASTM D-448, gradation size 67, and shall conform to the stamped, approved private construction drawings.
- Mylar "As-Built" record drawings and a Certificate of Inspection are required for the private on-site work prior to validation of a Certificate of Occupancy for the buildings in this development.
- *Sewer Use and Drainage Permits* are required for all buildings in this development. No sanitary or storm connection may be made to any building under the terms of this application.
- If work under this application is not commenced within one (1) year from the plan approval date or, if after partial completion, the work is discontinued for a period of one (1) year, this application shall become void.
- Upon substantial completion of the project, DES will provide me or my representative with written notification of the outstanding work, which shall be completed as determined by DES Engineer.

Applicant Information (must be signed and sealed):
If applicant is a corporation, signature must have proper notary or corporate seal
If applicant is not a corporation, signature must have proper notary seal
