

Denver Parks + Recreation

Sustainable Parks

What's happening in this area?

**Denver Parks and Denver Water are
working together on a project to help:**

- **Reduce water use**
- **Improve water quality**
- **Create a protective buffer for trees**
- **Improve air quality by reducing CO₂
emissions from mowers**
- **Promote sustainable park landscapes**

**The old grass cover will serve as a protective
“bed” for new plant seeds to grow and thrive.
Please be patient as this area is established.**

**For more information, visit us at:
www.denvergov.org/parks**
