Valuation of Work (\$)			
Description of Work (include floor and suite numbers)			
Fire sprinkler system specification:			
System design is based on latest NFPA pamphlets adopted by the City and County of Denver and International Fire Code for wet sprinkler systems only.			
I have a current license within the City and County of Denver as a Fire Protection Contractor A or B.			
Relocation of 20 or fewer sprinklers in light hazard occupancies only. These 20 sprinklers may include up to a maximum of 5 added sprinklers.			
The pipe schedule method shall be permitted only for additions or modifications to existing pipe schedule systems sized according to the pipe schedules of Section 14.5. Under no circumstances should a new pipe schedule system be connected to or supplied from an existing hydraulically designed system, see Section 14.4.1. All additions and relocations to existing hydraulically designed systems have been hydraulically verified for compliance per NFPA pamphlets prior to installation.
