

Project Overview

Project Scope

Renovation work at the Westwood Child Care Center (operated by Mile High Montessori) comprised a 4,755 square-foot expansion of the facility along with renovation of approximately 5,300 square feet of existing space. Major improvements included the transformation of toddler and infant classrooms into fresh, light-filled spaces; four new preschool classrooms with new furniture and materials, plus new support spaces; nine additional parking spaces and a more convenient place for drop-off and pickup of children; new sustainable design features including solar panels and daylighting; installation of a new public art mural and sculpture bench; and renovation of the facility's outdoor learning spaces and landscaping features, which converted an existing flat grass area into rolling hills complete with winding pathways, decks, shade structures, and new play equipment.
