

## Project Overview

### Project Scope

Denver CARES provides a safe setting for alcohol detoxification for public inebriates, as well as assessment, education, counseling, and residential treatment services. This project comprised complete renovation of the building's restroom facilities in order to make them safer for those in treatment. In addition to lighting upgrades and rehabilitation of restroom and shower stalls, new fixtures were installed including sinks, hand dryers, shower heads, bath towel hooks, toilets, and urinals. Grab bars were added to shower facilities to further improve safety and accessibility. Fixtures, fasteners, buttons, and door knobs were designed with user safety in mind, fully eliminating sharp edges, exposed pipes, and other means by which users may have attempted to inflict self-harm.

BETTER DENVER BOND PROGRAM  
PROJECT COST:  
**\$180,000**

### Project Team

Project Manager: Greg Bertram  
Designer(s): N/A  
Constructor(s): GH Phipps
