

Project Overview

Project Scope

Denver Health and Hospital Authority (Denver Health) was established in 1860 and is responsible for providing quality preventive, acute and chronic health care to Denver residents and the community at large. In order to increase capacity and to better serve the neighborhoods of southwest Denver, Denver Health recently began planning for the design and construction of a new state-of-the-art, 45,000 square-foot facility on South Federal Boulevard. In order to assist Denver Health in carrying out its mission, the City and County of Denver committed to partially fund the project. While pledging up to \$13,250,000 in CIP funds over a period of 15 years, the City made \$1,400,000 in Better Denver Bond Program funds available upfront in order to facilitate land acquisition for the project.

BETTER DENVER BOND PROGRAM
PROJECT COST:
\$1,400,000
