

Civic Center Historic Features Restoration

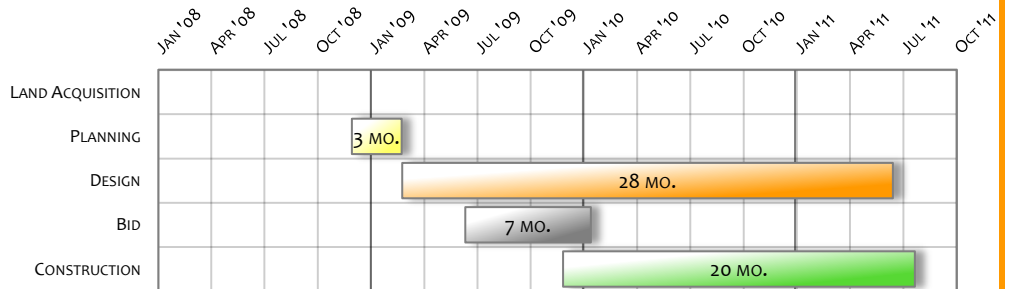

Project Overview

1.04.01.01-04
 101 W. 14th Ave. Pkwy.
 Denver, CO 80204
 District 10

Project Scope

The Civic Center Historic Features Restoration project included important updates to various elements within Denver's Civic Center Park, including its Greek Theater, Voorhies Memorial and Broadway Terrace. Restoration work generally comprised the following: ADA-related improvements; installation and restoration of concrete flatwork; rehabilitation of the brick promenade; new concrete and crusher-fines walking paths; irrigation system improvements; additional landscaping; replacement of aging concrete stairs; new and improved outdoor lighting systems; stabilization of existing structures; masonry restoration; upgrades to building systems (electrical, mechanical, lighting, and fire safety); drainage improvements; updates to interior building finishes; window repair and replacement; and restoration of historic balustrade. The project also included expansion of the northeast corner of the park to encompass the West Colfax Avenue right turn lane at Broadway.
