

## Project Overview

### Project Scope

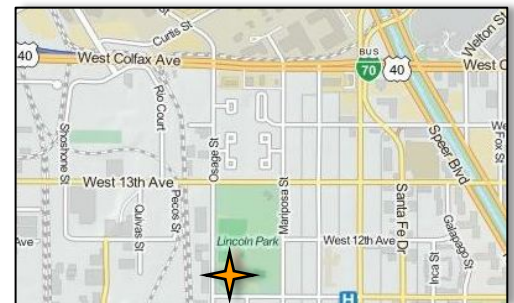

The La Alma Outdoor Pool project comprised demolition of an existing swimming pool and construction of new, state-of-the-art pool facilities along with an improved pool house. Scope included demolition; sub-surface drainage improvements; earthwork and site preparation; specialized colored and textured concrete with aquatic surface treatment; electrical, mechanical and plumbing associated with the swimming pool; site furnishing installation; a new irrigation system; and enhanced landscaping. Building construction included a new pool house facility with men's and women's showers, water closets and changing spaces, family changing rooms, staff office and control station, mechanical room for pool equipment, and chemical storage space.
