

City of Axum Park Playground Improvements

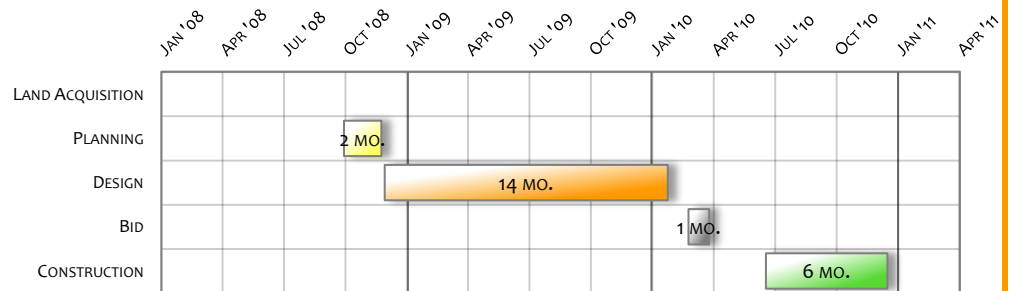

1.04.14.02
3200 N. Birch St.
Denver, CO 80222
District 8

Project Overview

Project Scope

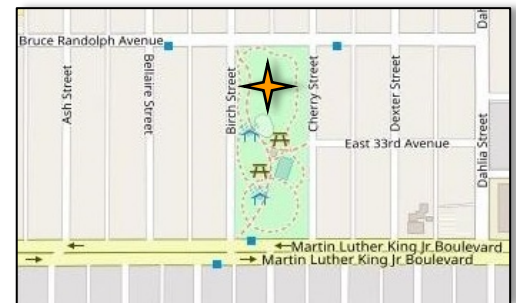

Improvements to City of Axum Park consisted of general site improvements including new concrete and crusher-fines pathways, a plaza area, two new picnic shelters, modernized playground equipment, an improved basketball court, and enhanced site amenities and furnishings. The new playground includes play spaces for various ages, and the picnic areas include tables and grills for outdoor events. Additional planting beds were included in the park's re-design, as was a new irrigation system aimed at efficiently irrigating new sod, trees and ornamental shrubs/perennials. Finally, a mural celebrating Denver and its sister city of Axum, Ethiopia, was installed on the park's existing restroom.
