

Hampden Heights Playground Improvements

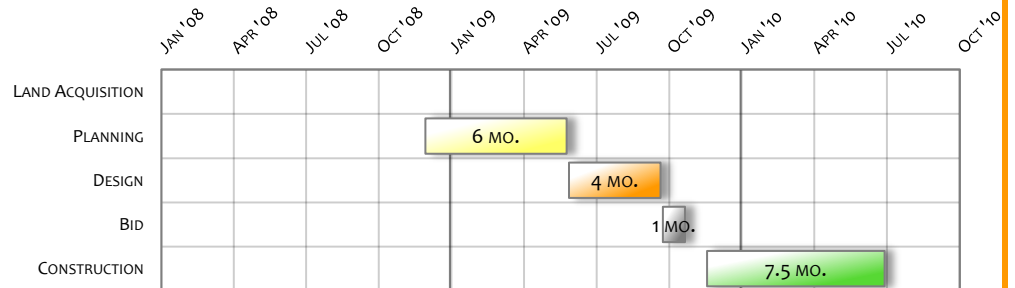

1.04.14.10
3301 S. Clinton Ct.
Denver, CO 80231
District 4

Project Overview

Project Scope

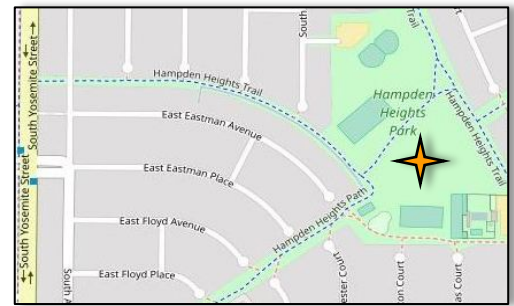

The Hampden Heights playground was redesigned to create spaces for children of all ages and abilities, to provide informal play areas, and to install play structures that develop a child’s imagination as well as their physical and social skills. Large areas of sod were removed and then replaced with expanded playground areas and new gathering spaces. The playground now includes two play pits, one for intermediate age children and one for tots, replacing what was a single area for multiple ages. The intermediate play pit features a large climbing structure, spinners, belt swings, and a “Moon” climbing boulder. The tot play pit includes a tot structure, swings, a spinning bowl, sand area, and a rubberized surface with craters and small climbable mounds that mimic the moon’s surface. Each of the two play pits includes ADA-accessible surfacing and ramps. Additional sod and landscaping were included, as were improvements to the existing irrigation system.
