

Central Park Recreation Center (New)

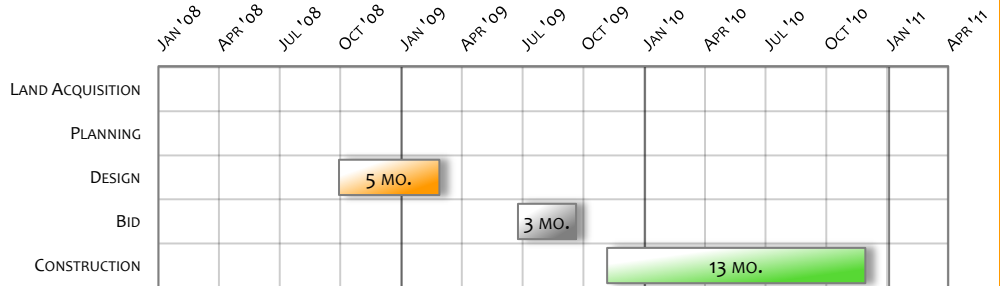

1.04.21.01
9651 E. M.L.K. Jr. Blvd.
Denver, CO 80238
District 8

Project Overview

Project Scope

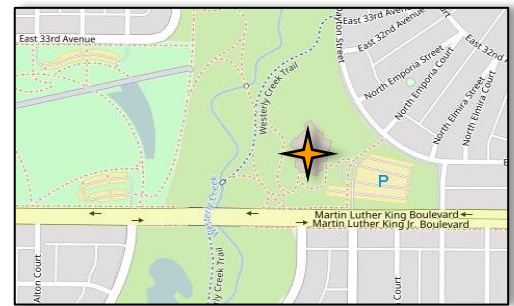

The new Central Park Recreation Center is a regional facility that serves Stapleton and surrounding neighborhoods. Top-notch amenities and special facilities make this recreation center stand out. The facility boasts an NCAA-certified gymnasium with bleachers, indoor four lane adult lap pool, indoor leisure pool with slides, spray features and lazy river, locker rooms, group exercise facilities, cardio equipment areas, and a spinning studio. A family lounge, child care center, pool party room, sun plaza, and community meeting room enable people to build healthy connections with each other. The recreation center's site, being adjacent to the citywide Westerly Creek trail system, offers great views and gives users the benefit of expanding their recreation to the outdoors. An environmentally sustainable approach was used in the design and construction of the facility in order to seek and achieve LEED Gold certification.
