

## Project Overview

### Project Scope

Enhancements to public safety facilities approved by Denver voters as part of the Better Denver Bond Program comprised major renovations of five Denver fire stations, including Station Number 23. Renovation work was comprised of the following primary activities: plumbing and HVAC improvements including low-flow fixtures and higher efficiency heating and cooling systems; reconstruction of distressed concrete flatwork; interior updates including new appliances, flooring, casework, and paint; upgrades to existing electrical and lighting fixtures; replacement of aging doors and windows; hose tower refurbishment; and enhancements to existing dispatch and traffic signalization systems.

BETTER DENVER BOND PROGRAM  
PROJECT COST:  
**\$1,146,554**

### Project Team

Project Manager: Mark Guerrero  
 Designer(s): OZ Architecture  
 Constructor(s): Haselden Construction, PCL Construction Services Inc.
