

# 14th Street (Market St. to Colfax Ave.) Streetscape & Sidewalk

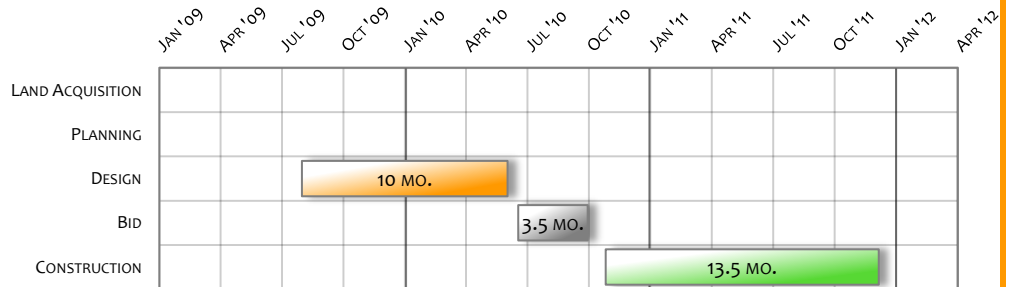

1.06.03.01  
Market St. - Colfax Ave.  
Denver, CO 80202  
District 9

## Project Overview

### Project Scope

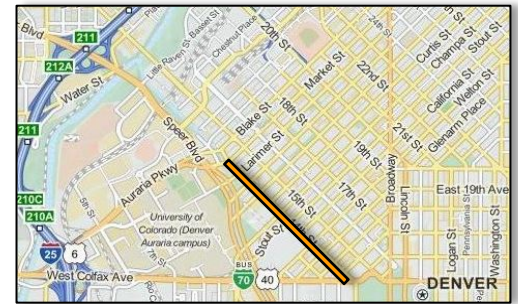

Streetscape and sidewalk enhancements along 14th Street between Market Street and West Colfax Avenue included the following: new bike racks and a dedicated bike lane which connects the Cherry Creek trail and Civic Center Park; widening of the northern sidewalk to 19 feet and reconstruction of the southern sidewalk to 16 feet with sandblasted accents; curb extensions on the south side of 14th Street intersections which minimize pedestrian crossing distances; road surface reconstruction; and improvements adjacent to the sidewalks including granite seating areas, pedestrian lighting, accent lighting, wayfinding monuments, and elongated planters and planter pots containing annual plantings, shrubs and trees. The project was accomplished through a public/private partnership, with \$10 million provided from the Better Denver Bond Program and an additional \$4 million from the 14th Street General Improvement District, formed in August of 2009.
