

Colfax Avenue (Sheridan Blvd to Federal Blvd) Improvements

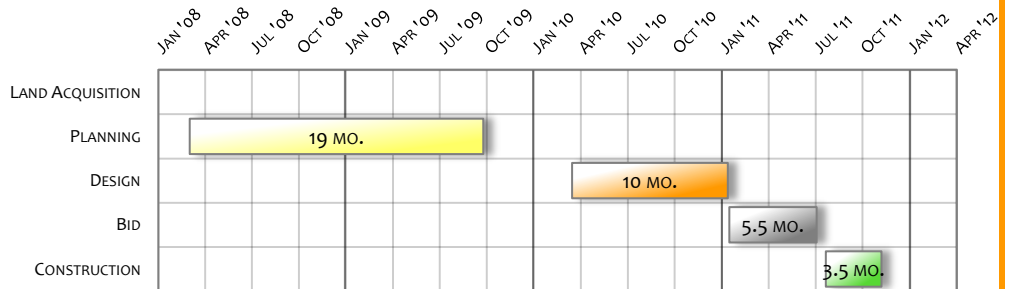

1.06.08.01
 Sheridan Blvd. -
 Federal Blvd.
 Denver, CO 80204
 Districts 1 & 3

Project Overview

Project Scope

This project commenced construction in August 2011, when the City began implementing recommendations outlined in the West Colfax Corridor Transportation Study. The project comprised the following scope elements: milling and replacement of approximately 20 blocks of existing asphalt road surface; intersection safety enhancements at West Colfax Avenue and Irving Street including accessibility improvements, new traffic signals, drainage upgrades, and new manholes; construction of raised concrete medians between Sheridan Boulevard and Yates Street and between Knox Court and Irving Street to reduce left turns and traffic backups; reconfiguration of West Colfax Avenue from five traffic lanes down to four (two in each direction) to allow for designated on-street parking; establishment of designated on-street parking areas, alternating on the eastbound/westbound sides of West Colfax Avenue; and installation of new signage throughout the project area.

BETTER DENVER BOND PROGRAM
 PROJECT COST:
\$960,215

Project Team

Project Manager: James Mackay
 Designer(s): Muller Engineering Company Inc.
 Constructor(s): Brannan Sand & Gravel Company
