

East Colfax Wrap Around Street Lighting

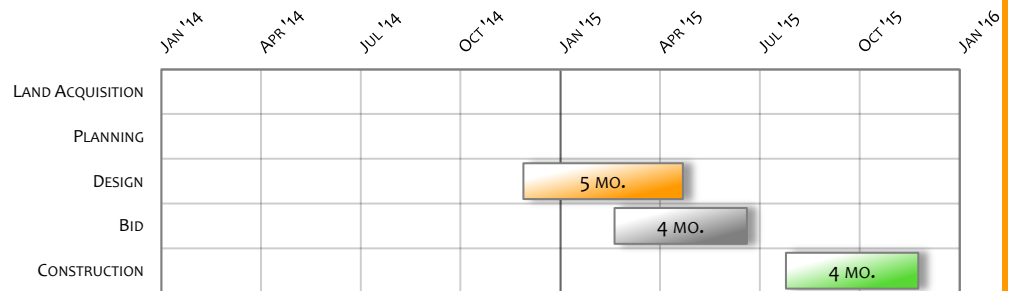

Project Overview

1.06.09.02
Grant St.-Columbine St.
Denver, CO
80203/80206/80218
Districts 9 & 10

Project Scope

The East Colfax Wrap Around Street Lighting project was a continuation of pedestrian lighting improvements completed during the Colfax Avenue (Grant St to Columbine St) Improvements project. During this subsequent phase of lighting improvements, an additional 23 pedestrian lampposts were installed at various East Colfax Avenue intersections, though in this case they were extended around corners and onto adjacent cross streets. The project utilized savings from the first phase of work to further enhance the pedestrian environment within the East Colfax Avenue transit corridor. Similar to the previous project, the newly installed lights will be maintained by the Colfax Business Improvement District.

BETTER DENVER BOND PROGRAM
PROJECT COST:
\$674,406

Project Team

Project Manager: Edward Haun
