

# Central Park Blvd at I-70 Interchange

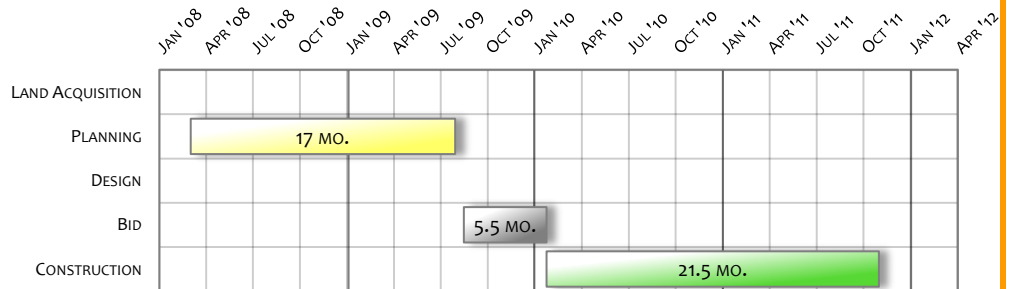

1.06.19.01  
 E. 40th Ave. -  
 E. 46th Ave.  
 Denver, CO 80216/80266  
 District 8

## Project Overview

### Project Scope

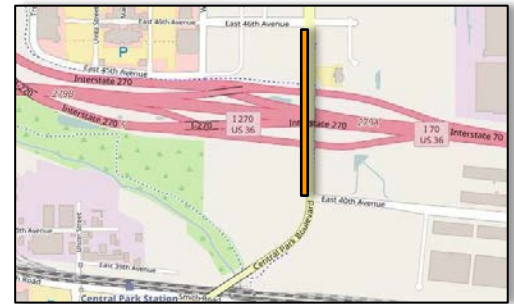

The Central Park Boulevard at I-70 Interchange was constructed between East 40th and East 46th Avenues with funding from the Better Denver Bond Program and the American Recovery and Reinvestment Act. The new Central Park Boulevard overpass joins existing developments to the north and south of Interstate 70 with a multi-modal bridge to accommodate increasing vehicular, pedestrian and bicycle travel. (The overpass includes six traffic lanes and twelve-foot sidewalks.) The second component of the project includes new ramps connecting Central Park Boulevard to Interstates 70 and 270. These connections are aimed at reducing traffic on the interstate highways as well as providing improved access to new residential and commercial developments throughout the Stapleton neighborhood.

BETTER DENVER BOND PROGRAM  
 PROJECT COST:  
**\$17,233,053**

### Project Team

Project Manager: Jess Ortiz  
 Designer(s): URS Corporation, Harris Kocher Smith, PBS&J  
 Constructor(s): SEMA Construction Inc.
