

Quincy Avenue (Pierce St to Sheridan Blvd) Improvements

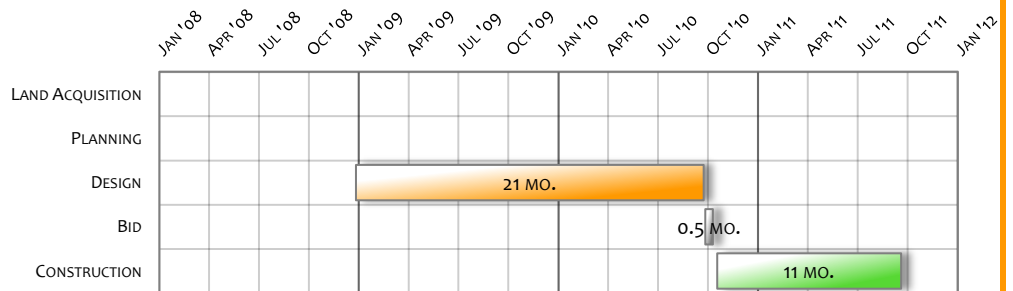

1.06.20.01
 S. Pierce St. -
 S. Sheridan Blvd.
 Denver, CO 80235
 District 2

Project Overview

Project Scope

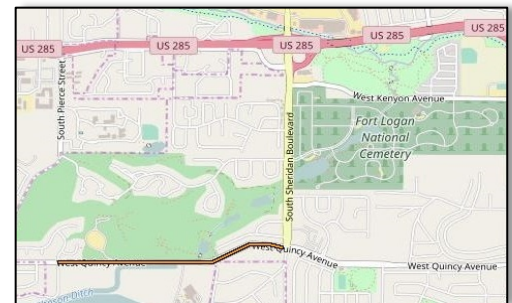

The Quincy Avenue (Pierce St to Sheridan Blvd) Improvements project improved vehicular and pedestrian safety along West Quincy Avenue by grading out an existing hill and widening the roadway from two lanes to four. On average, the roadway and hill were lowered by about 4.5 feet to improve sight distance, and a painted median was added to facilitate left turns across oncoming traffic. To accommodate the lowered roadway elevation, existing water lines running beneath West Quincy Avenue were also lowered. The City coordinated with Denver Water to complete the related relocation work in parallel.

BETTER DENVER BOND PROGRAM
 PROJECT COST:
\$2,983,897

Project Team

Project Manager: Edward Haun
 Designer(s): PBS&J, Atkins
 Constructor(s): Parsons Commercial Technology Group Inc.
