

# Ross-Barnum Branch Library

## Renovations

### Project Overview

1.07.01.02  
3570 W. 1st Ave.  
Denver, CO 80219  
District 3

### Project Scope

Renovation work at the Ross-Barnum Branch of the Denver Public Library comprised upgrades to incoming electrical service, installation of new fencing surrounding upgraded electrical equipment, improvements to the building's main entrances including new doors and glass block walls, procurement and installation of self-check stations, as well as installation of a radio frequency identification (RFID) system. Together, the self-check and RFID technologies allow for automated self-check of library media and provide numerous benefits including improved circulation/collection management, reduced theft of library materials, increased efficiency of library staff, and an enhanced customer experience.

BETTER DENVER BOND PROGRAM  
PROJECT COST:  
**\$112,686**

### Project Team

Project Manager: Ken Matthews  
Designer(s): Humphries Poli Architects PC
