

## Project Overview

### Project Scope

Renovation work at the Hampden Branch of the Denver Public Library comprised upgrades to incoming electrical service, upgrades to existing mechanical systems, restoration of aging skylights, recoating of the structure's standing seam roof, reconfiguration of interior spaces to enhance circulation, updates to interior finishes and furnishings, procurement and installation of self-check stations, as well as installation of a radio frequency identification (RFID) system. Together, the self-check and RFID technologies allow for automated self-check of library media and provide numerous benefits including improved circulation/collection management, reduced theft of library materials, increased efficiency of library staff, and an enhanced customer experience.

BETTER DENVER BOND PROGRAM  
PROJECT COST:  
**\$1,001,924**

### Project Team

Project Manager: Elizabeth Hamilton  
Designer(s): Humphries Poli Architects PC, Studiotrope
