

# Park Hill Branch Library Renovations

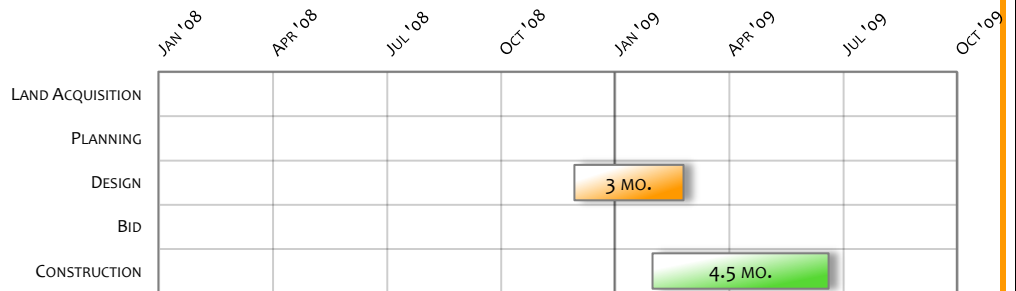

1.07.01.15  
 4705 Montview Blvd.  
 Denver, CO 80207  
 District 8

## Project Overview

### Project Scope

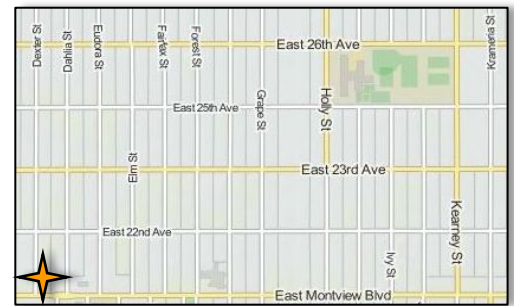

Renovation work at the Park Hill Branch of the Denver Public Library comprised upgrades to existing electrical, fire protection and plumbing systems, roof restoration, reconfiguration of interior spaces to enhance circulation, updates to interior finishes and furnishings, procurement and installation of self-check stations, as well as installation of a radio frequency identification (RFID) system. Together, the self-check and RFID technologies allow for automated self-check of library media and provide numerous benefits including improved circulation/collection management, reduced theft of library materials, increased efficiency of library staff, and an enhanced customer experience.

BETTER DENVER BOND PROGRAM  
 PROJECT COST:  
**\$487,691**

### Project Team

Project Manager: Elizabeth Hamilton  
 Designer(s): OZ Architecture  
 Constructor(s): Interlock Construction Corp.
