

Schlessman Family Branch Library

Renovations

Project Overview

1.07.01.17
100 Poplar St.
Denver, CO 80220
District 5

Project Scope

Renovation work at the Schlessman Family Branch of the Denver Public Library comprised reconfiguration of the building's existing book drop to accommodate a new automated book sorter, procurement and installation of self-check stations, as well as installation of a radio frequency identification (RFID) system. Together, the self-check and RFID technologies allow for automated self-check of library media and provide numerous benefits including improved circulation/collection management, reduced theft of library materials, increased efficiency of library staff, and an enhanced customer experience.

BETTER DENVER BOND PROGRAM
PROJECT COST:
\$449,901

Project Team
