

Valdez-Perry Branch Library Renovations

1.07.01.20/25
4690 Vine St.
Denver, CO 80216
District 9

Project Overview

Project Scope

Renovation work at the Valdez-Perry Branch of the Denver Public Library comprised a small building addition that provides much needed office and storage space, upgrades to electrical and mechanical systems, reconfiguration of interior spaces to enhance circulation, accessibility improvements, updates to finishes and furnishings, technology enhancements, procurement and installation of self-check stations, as well as installation of a radio frequency identification (RFID) system. Together, the self-check and RFID technologies allow for automated self-check of library media and provide numerous benefits including improved circulation/collection management, reduced theft of library materials, increased efficiency of library staff, and an enhanced customer experience.

BETTER DENVER BOND PROGRAM
PROJECT COST:
\$641,601
