

Denver Botanic Gardens The Hive & Science Pyramid

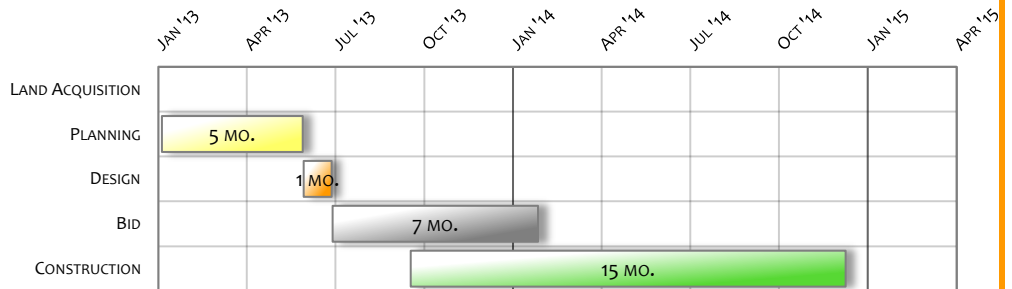

Project Overview

1.08.05.01-02
1007 York St.
Denver, CO 80206
District 10

Project Scope

New construction at the Denver Botanic Gardens consisted of two primary scope elements. The first comprised design and renovation of the Gardens' primary outdoor dining venue, The Hive, including buildout of a full-service kitchen, construction of new restroom facilities, and minor improvements to the adjacent deck and Le Potager garden. The second scope element consisted of programming, design, site preparation, and construction of the new Science Pyramid, a state-of-the-art learning center designed to provide both visitors and students with interactive plant- and weather-related science education. The Hive and Science Pyramid were delivered in parallel by a single project team comprised of GH Phipps as the construction manager/general contractor (CMGC) and Burkett Design as the principal design firm.

BETTER DENVER BOND PROGRAM
PROJECT COST:
\$6,619,000
