The Financial Empowerment Centers program is part of a national effort to improve the financial stability of households by integrating high-quality, one-on-one financial education and counseling to achieve multiple outcomes for clients. The FEC program is led locally by the Office of Financial Empowerment & Protection, a City office designed to improve residents’ economic mobility by identifying and eliminating barriers to financial stability. This report summarizes outcomes from programs, policies, and practices to help stabilize families and individuals.

The American Community Survey (ACS) is a national, ongoing statistical survey that samples a small percentage of the population every year. Although the American Community Survey (ACS) produces population, economic, housing, and income estimates for metropolitan areas, it is the Census Bureau’s Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.
