Landmark Preservation Documentation
Design Review Standards: Elevation Drawings

Applications submitted for design review or demolition review must be accompanied with specific information which adequately describes or studies the proposal. To comply with the required submittal standards of Denver Landmark Preservation, submitted documentation shall clearly illustrate the existing conditions as well as any proposed alteration(s).

Elevation Drawings must include the following:

- Street address, façade direction, scale (plans must be drawn to a measurable scale)
- Major dimensions
- Proposed architectural materials
- Clearly label all proposed work (additions)
- Note height of adjacent properties (new construction)

**Front Elevation**

Scale: 1/4” = 1’-0”

(Scale and example purposes)

- 12x12 ridge beam
- 2” galv. metal trim installed over felt paper on 2x6 fly rafter
- 2” asphalt roof shingles
- Cedar shake siding
- Pella Architectural Series wood window

LEGAL DISCLAIMER: This Advisory should not be used as a substitute for codes and regulations. The applicant is responsible for compliance with all code, guideline and/or rule requirements, whether or not described in this Advisory.
