Case Summary:
The applicant submitted a Landmark Designation application for 1168 S Gilpin St to CPD on July 9, 2019. Staff performed an investigation and found the application to be complete and to meet Denver Landmark designation criteria. As such, a public hearing at the Landmark Preservation Commission was scheduled for October 15, 2019.

Designation Criteria and Evaluation, Chapter 30, Denver Revised Municipal Code:
To meet landmark designation criteria, in accordance with Chapter 30-4, Denver Revised Municipal Code, a structure must meet the following criteria:

1. Meet one designation criteria in two or more of the following categories:
   - History
   - Architecture
   - Geography
2. Maintain its historic or physical integrity
3. Relate to a context or theme
Criteria Evaluation:
Landmark staff found that the application meets History Criterion 1a, and Architecture Criteria 2a and 2b.

1. Historical Significance
To have historical significance, the structure or district shall be thirty (30) or more years old or have extraordinary importance to the historical development of Denver, and shall:

a) Have direct association with the historical development of the city, state or nation
The property is directly associated with the historical development of Washington Park and the Washington Park Neighborhood. It illustrates the Washington Park Place subdivision development of large, ornate building styles and forms due to the influx of wealth. One affluent investor was Jane C. Peet, a developer who commissioned the design and construction of 1168 S Gilpin St as an investment property in 1916, in addition to other properties in the area like the house at 1717 E Arizona Ave in 1915, located on the same block. Several well-known architects were associated with the design of the buildings and landscape of Washington Park, including Jules Jacques Benois Benedict who designed the Smith Lake boathouse in 1913. Peet commissioned Benedict to design the houses at 1168 S Gilpin St and 1717 E Arizona Ave, creating a strong connection between the design and development of the park and surrounding neighborhood.

2. Architectural Significance
To have architectural importance, the structure or district shall have design quality and integrity, and shall:

a) Embody distinguishing characteristics of an architectural style or type
The house at 1168 S Gilpin St is an excellent and intact example of the Italian Renaissance Revival style. Built between 1916 and 1917, it successfully conveys numerous character-defining features of the style including a stucco exterior, wide overhanging eaves supported by decorative brackets, hipped roof, arched main entrance with a decorative surround, full-length arched window openings on the first story with decorative surrounds, and terra cotta detailing. Unique design elements include oblong arched surrounds of the doors and windows and angled buttresses at the main entrance.

b) Be a significant example of the work of a recognized architect or master builder
The Italian Renaissance Revival style house is a significant example of the work of prominent Colorado architect Jules Jacques Benois Benedict. Over his nearly 40-year career as an architect (1909-1942), Benedict designed many notable residential, commercial, public, educational and park structures. The house at 1168 S Gilpin St is one of Benedict’s earliest designs and reflects a more modest approach to the Italian Renaissance Revival style than those he used in his larger, more imposing residential designs of the same style. It fits the urban neighborhood environment and was
built several years before his popularity increased and he shifted focus to designing houses in Denver’s Country Club Neighborhood.

**Integrity:**
Chapter 30, DRMC requires that a landmark designated property maintain its historic or physical integrity, defined as “the ability of a structure or district to convey its historic and architectural significance...recognized as belonging to its particular time and place in Denver’s history.” The seven qualities that define integrity are location, setting, design, materials, workmanship, feeling and association.

The primary structure retains integrity of location, design, setting, materials, workmanship, feeling and association. Several buildings from around the property’s 1916 period of significance remain, as does Washington Park. Major alterations that have gained significance include the construction of a retaining wall along the property’s south boundary in 1925 and a two-story brick addition on the east, or rear, elevation in 1926. Benedict’s original design is easily recognizable.

**Relate to a Historic Context/Theme and Period of Significance:**
The property relates to the theme of housing near Denver’s parks and parkways between 1905 and 1929. The park and parkway system was designed by well-known landscape architects Saco R. DeBoer, George E. Kessler, Charles Mulford Robinson, Reinhard Schuetze, and brothers John Charles and Frederick Law Olmstead. They envisioned an integrated system of stately public buildings and appealing surrounding neighborhoods. Reinhard Schuetze designed Washington Park.
Between 1905 and 1929, Denver added nearly 16,000 detached single-family dwellings to its housing stock to accommodate its growing population. Three distinct housing types prevailed along Denver’s parkways and near its parks: Revival style mansions for the elite, like the Italian Renaissance Revival style of 1168 S Gilpin St, and either Foursquares or Bungalows for the middle class. Benedict was a key Denver architect who designed large, ornate houses near the parks and parkways during this period, including 1168 S Gilpin St in 1916.¹

**Boundary:**
The designation application proposes to designate the following legal description:

LOT 14 TO 17, BLOCK 5, WASHINGTON PARK PLACE BLOCKS 5 TO 7 INCLUSIVE, CITY AND COUNTY OF DENVER, STATE OF COLORADO

**Public Review Process:**
Community Planning & Development has met or exceeded all posting and notification requirements delineated in Chapter 12 (Article III, Section 12-96) and Chapter 30 of the DRMC.

**Notifications:**
- Owner notification letters regarding the LPC public hearing
- City Council, Planning Board, and Building Inspection email notifications
- Registered Neighborhood Organization and courtesy email notifications
  - Washington Park East Neighborhood Association
  - FANS of Washington Park
  - Inter-Neighborhood Cooperation (INC)
  - Historic Denver, Inc.
  - Colorado Preservation, Inc.
