

Office of Human Resources
Applications Support Administrator Associate - CA3064
THIS IS A PUBLIC DOCUMENT

General Statement of Duties

Performs standard level professional work related to supporting, deploying, configuring, and the usage of departmental and/or other application system(s) to support the agency/city's goals

Distinguishing Characteristics

The Applications Support Administrator Associate is distinguished from the Associate IT System Administrator, which performs standard level professional information technology work installing and configuring operating system hardware and software and user application software; maintaining and repairing routine to complex problems with system hardware and software.

The Applications Support Administrator Associate is distinguished from the Associate IT Systems Analyst, which performs standard or intermediate level professional work analyzing, refining and documenting the business requirements of City department and agency customers included in the development, implementation and production of integrated technology software systems.

The Applications Support Administrator Associate is distinguished from the Applications Support Administrator Senior, which performs full performance professional support to coordinate and manage activities related to the support, deployment, configuration, and usage of departmental application systems.

This position is a liaison to Technology Service and the application customers, as such, this position will work with both technology Services and the end users of applications to identify deficiencies and enhancement opportunities, coordinate and/or perform testing, develop documentation, training materials and test plans, help create business case information to present to Technology Services and support the City's Technology and Data Security Standards within the Business Unit.

Level of Supervision Exercised

None

Essential Duties

Performs routine to moderately complex duties by working closely with department managers and application users to document and/or design/redesign effective business processes including projects that require effective implementation or reimplementation.

Performs routine to moderately complex duties by working closely with department managers and application users to identify, document and/or recommend enhancements to or procurement/development of business applications.

Make recommendations on improvements to business processes and applications with the goal of delivering enhanced service and outcomes (e.g., faster permit processing times, automating current manual or inefficient processes, etc.)

May consults with users to identify new business requirements, then evaluates and recommends solutions to meet user needs.

May develop and implement tactics for warehouse implementation, data acquisitions and archive recoveries. May also develop, implement and maintain data migrations, extraction, transform and load functions. May design and build relational databases. Maintains data integrity.

Creates and provides custom reports/queries/dashboards. Identifies, documents and reports potential issues with application interfaces and data import/export methodologies. May interpret data from existing data systems and provide results to appropriate audiences.

Provides guidance and support with detailed reports and analytics as requested, which may include database extraction, queries, database uploads and integration to other software platforms. Fulfills adhoc requests for data analysis and/or reports.

Develop and deploy standards, methodologies, and best practices for applications utilization, business process improvement, application interfaces, and report writing. Document procedures, applications interfaces, service-level agreements, and other methodologies related to applications systems.

Assists with developing, and presenting training. Facilitate training sessions as necessary. Maintain user documentation, implementation, and maintenance plans.

Assists with the maintenance, systems configuration, testing, support and upgrade of existing software applications and systems; assists with coordinating and communicating upgrades, enhancements, and changes with vendors and internal customers. Troubleshoots software problems.

Assist in maintaining a secure information technology environment for software applications. Assists application security administration, update processes and schedules, notifying users of any potential service interruptions, when required.

May work directly with Technology Services to enhance technology capabilities. May be the Technology Services liaison for infrastructure and technology projects or system enhancements.

By position, may manage a budget for infrastructure projects.

By position, may lead routine and non-complex projects.

Performs other related duties as assigned or requested.

Any one position may not include all of the duties listed. However, the allocation of positions will be determined by the amount of time spent in performing the essential duties listed above.
