

Office of Human Resources  
Workday Analyst Senior - CA3211  
THIS IS A PUBLIC DOCUMENT

### General Statement of Duties

Performs full performance professional level work to design, implement or enhance, and test Workday systems and applications to meet business needs. Develops and manages all business process configuration, performs mass uploads and manages recurring processes. Performs complex configuration, change management and testing activities to support a service-oriented architecture and integration between Workday Modules. Plans, develops, and executes complex functional, system regression, integration and performance testing. Consulting with agency users regarding organizational hierarchies and security needs and analyzes requests with respect to City rules, Technology Service processes and Workday best practices.

### Distinguishing Characteristics

The Workday Analyst Senior is distinguished from the Workday Analyst Associate which performs intermediate professional level work supporting one or more system modules to design, implement or enhance, and test Workday systems and applications to meet business needs. Performs configuration, change management and testing activities to support a service-oriented architecture and integration between Workday Modules. Plans, develops, and executes moderately complex functional, system regression, integration and performance testing. Consulting with agency users regarding organizational hierarchies and security needs and analyzes requests with respect to City rules, Technology Service processes and Workday best practices.

The Workday Analyst Senior is distinguished from the Workday Analyst Specialist which performs specialized, advanced, highly complex, and multi-dimensional work to design, implement or enhance, and test Workday systems and applications to meet dynamic business needs. Owns business process design configuration and maintenance. Performs advanced configuration, change management, and testing activities to support a service-oriented architecture and integration between Workday Modules. Plans, develops, and executes advanced, highly complex functional system regression, integration, and performance testing. Consults with agency users regarding organizational hierarchies and security needs and analyzes requests with respect to City rules, Technology Service processes, and Workday best practices.

### Level of Supervision Exercised

None

### Essential Duties

Recommends changes to business process upgrades and enhancements, including testing and data validation, and ensure that overall system performance is aligned with business objectives. Develops and manages all business process configuration, performs mass uploads and manages recurring processes.

Work closely with leadership, business partners and functional and technical teams to gather and define requirements and recommendations. Assists in creating more efficient use of resources through tracking, automating and streamlining processes. Document changes for change control purposes, design and implement solutions.

Develop course curriculum, create job aides, and conduct in-person training.

Create review and participate in functional and regression testing for all system fixes, upgrades, patches, and other maintenance including bi-annual Workday releases and new system features and participate in the communication of changes and benefits to end users.

Participate in enhancement projects as defined by leadership, which includes leading meetings, providing regular project updates, and adhering to project deadlines.

Provides quality checks and review and, on occasion, processes employee and contingent worker transactions within the system, such as job changes, comp changes, promotions, and terminations.

Responds to user inquiries and requests for assistance.

Provides second-level technical support. Maintains supervisory organization structures. Troubleshoots production/data issues.

Maintains integrity, security and accuracy of data and systems.

Maintains in-depth knowledge of current Workday tools in order to provide full functional support to end users.

Utilizes Excel and other applications to manipulate, analyze and logically present data to end users at any level of the organization.

Performs other related duties as assigned or requested.

Any one position may not include all of the duties listed. However, the allocation of positions will be determined by the amount of time spent in performing the essential duties listed above.

## Competencies
