## NOTICE

### **Denver Fire Code and Security Requirements for Marijuana Occupancies**

As required per Denver Fire Code, all marijuana facilities must install a Knox Box and maintain updated keys for emergency response access. Please find more information regarding product specifications and installation information on the Knox Box website:

<https://www.knoxbox.com/documents/>.

For questions regarding Knox Box or to request alternate placement locations, please contact us at 720-913-3474 to speak with a Technician in the Marijuana Inspections Group.

An additional security measure which is allowed for occupancies, including marijuana facilities, by the Denver Fire Code, is a multi-point locking door, frequently referred to as a 'trident' door. These doors include additional locking components, while still complying with egress hardware requirements.

For more information or other questions about requirements, please email us at: [dfdmarijuanaenforcement@denvergov.org](mailto:dfdmarijuanaenforcement@denvergov.org)
