AMENDMENT PROPOSAL

Please provide all of the following items in your amendment proposal.

Code Sections/Tables/Figures Proposed for Revision:

DBC-IFC 105.7.8.1 (NEW)

Proposal: Add new text as follows

- **Section 105.7.8.1 Conveyance Permits.** Conveyance Contractors whom are issued a permit for the installation, alteration, modification or removal of a conveyance shall notify the issuing party in writing upon completion of the scope of work specified in the issued permit. Upon notification the issuing party shall update the status of the permit to completed. If for any reason the original requestor of the permit is unable to complete the scope of work specified in the permit and the work is to be completed by a contractor other than the original, a new permit must be applied for and obtained by the conveyance contractor who will complete the specified scope of work.

Supporting Information:

- **Purpose:** The purpose of this new amendment is to provide more accurate permit tracking. There is currently no process requiring contractors to provide notification that the permitted scope of work has been completed.

- **Reason:** To maintain accurate records regarding who has been permitted to complete a particular scope of work and provide closure to permitting process.

- **Substantiation:** There is currently no provision requiring notification from a contractor that the permitted scope of work has been completed. Requiring the contractor to provide verification also provides assurance that the permitted scope of work was completed as they indicated in applying for the permit.
