</table>

Note: If the proposal is for a new section, indicate (new).

Proposals

DFC 919 On MRL elevator installations, the elevator controller and hoisting machine or any other electrical equipment used in conjunction with the elevator installed in the elevator hoistway shall be located a minimum of 12 ft above the pit floor. This would include elevator equipment installed in a control space and the back of the controller or other electrical equipment extends into the elevator hoistway.

Note: Show the proposal using strikeout, underline format. At the beginning of each section, one of the following instruction lines are also needed:

- Revise as follows
- Add new text as follows
- Delete and substitute as follows
- Delete without substitution

Supporting Information:

NFPA 72, Section 21.3.7, 2019 Edition requires that fire alarm initiating devices installed in the elevator hoistway be accessible from outside the hoistway for servicing, testing and maintenance. The elevator hoistway including the pit is restricted to elevator and emergency personnel and the State Division of Oil and Public Safety is also looking to restrict nonqualified personnel from entering the elevator hoistway. The next edition of ASNE A17.1, Safety Code for Elevators and Escalators will also contain similar requirements for the installation of fire alarm initiating device. This proposed amendment eliminates the need to install fire alarm initiating devices in the elevator pit.

Note: The following items are required to be included:

November 15, 2005
**Purpose:** The proponent shall clearly state the purpose of the proposed amendment to physical, environmental and customary characteristics that are specific to the City and County of Denver (e.g., clarify the Code; revise outdated material; substitute new or revised material for physical, environmental and customary characteristics; add new requirements to the Code; delete current requirements, etc.)

**Reasons:** The proponent shall justify changing the current Code provisions, stating why the proposal is necessary to reflect physical, environmental and customary characteristics that are specific to the City and County of Denver. Proposals that add or delete requirements shall be supported by a logical explanation which clearly shows why the current does not reflect physical, environmental and customary characteristics that are specific to the City and County of Denver and explains how such proposals will improve the Code.

**Substantiation:** The proponent shall substantiate the proposed amendment based on technical information and substantiation. Substantiation provided which is reviewed and determined as not germane to the technical issues addressed in the proposed amendment shall be identified as such.

**Bibliography** (as needed): The proponent shall submit a bibliography when substantiating material is associated with the amendment proposal. The proponent shall make the substantiating materials available for review.

**Referenced Standards:**

Click or tap here to enter text.

List any new referenced standards that are proposed to be referenced in the code.

**Impact:**

unknown

**Note:** The proponent shall indicate one of the following regarding the impact of the amendment proposal:

- The effect of the amendment proposal on the cost of construction; Increase, Reduce, No Effect:
- The effect of the amendment proposal on the cost of design; Increase, Reduce, No Effect:
- Is the amendment proposal more- or less-restrictive than the I-Codes; More, Less, Same:

**Departmental Impact:**

The effect of the amendment proposal on the cost of review; no effect.

**Note:** Indicate one of the following regarding the impact of the amendment proposal:

- The effect of the amendment proposal on the cost of review; Increase, Reduce, No Effect:
- The effect of the amendment proposal on the cost of enforcement/inspection; Increase, Reduce, No Effect:
