35th/36th Street Pedestrian Bridge Construction Update

New bridge scheduled to open by September 1, 2017

Construction continues on the new pedestrian and bicycle bridge that is part of the City and County of Denver's 38th & Blake Transit Oriented Development (TOD) project.

Due to ventilation work required for the bridge elevators, the new bridge is now expected to open no later than September 1, 2017. Upon completion, this new pedestrian and bicycle bridge will create an important multi-modal connection from Wazee and Blake between 35th and 36th streets.

The City shares the community's enthusiasm for opening this major improvement to neighborhood connectivity as soon as possible. Every effort is being made to expedite the construction process and the contractor has assured us the bridge will open no later than September 1. More details on the schedule will be provided as they are available.

Learn more by visiting www.denvergov.org/35-36bridge to register for ongoing project updates or by calling the NDCC hotline at (720) 865-2900.
Information about the other 38th & Blake TOD projects is available below.

**New Blake Street Bridge**

The Blake Street bridge over 38th Street opened last spring and has significantly improved multi-modal safety and connectivity in the area. It includes 8-foot wide sidewalks, improved overall lighting, as well as a new multi-use trail connection with RTD's 38th/Blake rail station.

**New Sidewalks and Bike Facilities**

Nearly 4,000 linear feet of new sidewalks and bicycle facilities were completed last spring, including installation of sidewalks where none previously existed. The project has significantly improved safety, accessibility and connectivity in the area.
