

**CITY AND COUNTY OF DENVER  
DEPARTMENT OF PUBLIC WORKS  
ENGINEERING DIVISION**

**Policy Statement**

<b>Subject:</b> Ultra Urban Green Infrastructure Guide	
<b>Number:</b> 13	<b>Effective Date:</b> March 1, 2016
<b>Approved:</b> Lesley B. Thomas, P.E., City Engineer 	

The City and County of Denver has made green infrastructure a fundamental part of the City's long-term stormwater management strategy. To succeed, the City has developed a set of site-scale green infrastructure standards that can be applied in the ultra-urban environment. The standards are detailed in a Public Works document titled "Ultra-Urban Green Infrastructure Guidelines".

Following a thorough vetting of these standards with the Urban Drainage and Flood Control District (UDFCD), internal agencies, and various external agency stakeholders, the City and County of Denver Public Works Department hereby adopts the 2016 printing of the "Ultra-Urban Green Infrastructure Guidelines" for practice with both private and Capital Projects that are operating in or are adjacent to the public Right-of-Way.
