DESIGN EVOLUTION

STEP 1
Conceptual design layout and function

STEP 2
Begins to evolve conceptual layout and functionality
- Refining some key station spacing & locations
- Refining access along corridor
- Clarifying other detailed elements of street design
- Identifying phasing opportunities

STEP 3
Complete final design and move towards construction

PUBLIC INVOLVEMENT
WE ARE HERE
10% DESIGN - CONCEPTUAL
30% DESIGN - PRELIMINARY
FINAL DESIGN

Engineering Details Addressed Throughout Project:
- Drainage
- Grading
- AADT Kemp Design
- Reconstruction Limits
