

TECHNICAL and ENGINEERING | What We Heard

- Ensure the channel meets the drainage needs for the community.
- Consider water quality opportunities in the channel.
- Provide a safe channel that is accessible for maintenance.
- Use natural landscaping (non-manicured).

TECHNICAL and ENGINEERING | Water Quality & Natural Landscape

WATER QUALITY

Streetside stormwater treatment to improve neighborhood water quality.

What We Heard
Improve water quality

Forebays incorporated to ensure a high level of water quality opportunities.

NATURAL LANDSCAPE

What We Heard
Give the greenway a park-like and native feel by using natural plantings.
