Design Workgroup Roster

The City and County of Denver is committed to working closely with local communities to inform the design of the 39th Avenue Greenway.

As part of a robust community engagement effort, and to ensure that community input continues to inform the design/build phase, we have formed this project-specific design workgroup. This design workgroup will collaborate with the City to help shape the priorities and design guidelines for the Greenway, while serving as an important connection between the project and the community.

The design workgroup is comprised of leadership from Registered Neighborhood Organizations, business organizations, civic groups, and individuals reflecting broad and diverse representation.
