Five Points Neighborhood Transportation Management Plan (NTMP)
The Neighborhood Transportation Management Program (NTMP) is a new program from DOTI that identifies and delivers quick solutions to address neighborhood transportation priorities and challenges. The Five Points statistical neighborhood was selected as the first to go through this process. Most improvements identified through this process are currently in design and being implemented, while many have been completed.

Operational Improvements
• 5 new all-way stops, 4 stop sign studies
• 3 new enhanced pedestrian crossings
• Crosswalk striping at 24 intersections
• Visibility Improvements at 18 intersections
• Adjusting the signal timing at 2 intersections
• 3 new bicycle route connections

6 Near-Term Projects
• 2 corridor striping enhancements
• Painted curb extensions at 16 intersections
• 1 pedestrian crossing improvement with new signal

9 Long-Term Projects
• One-way to two-way street conversions

Williams Street Bike Lane
As a part of the repaving project this spring on Williams between 31st Avenue and East 40th Avenue, a new bike lane installed. There will be no impacts to parking or the travel lanes. Repaving and bike lane installation is expected to occur between Spring and Summer of 2020.

**PROJECT BENEFITS**

- **Links Bikeways/Trails**: Connects to 39th Avenue Greenway
- **Fills Gap in Network**: Establishes new north/south bicycle connection.
- **Connects Proposed Bikeways**: E 31st Street, 39th Avenue Greenway, 40th Ave
- **High Visibility Crosswalks**: New crosswalk markings will be installed on Williams Street at E 31st, Martin Luther King Jr Blvd, Bruce Randolph, & E 37th Ave

**PROJECT CONSIDERATIONS**

- **No Parking Impacts**: The bike lane installation will not have impacts to existing parking along the street.

Denver Moves: Downtown

*Denver Moves: Downtown* is an effort to re-envision downtown’s transportation system by identifying near-term and long-term improvements to increase safety, provide more travel options, and improve overall accessibility.

DENVER MOVES Downtown

OPEN HOUSE

**LEARN MORE ABOUT THE PROPOSED FUTURE IMPROVEMENTS FOR GETTING AROUND ON DOWNTOWN STREETS.**

**MARCH 25TH, 2020**

5:30-7:30 PM

McNichols Civic Center Building | 144 West Colfax Avenue | Denver

**Study Area**

Denver Moves: Downtown is aimed to improve transportation in the heart of Denver by . . .

- Aligning mobility-related recommendations from past plans in area.
- Addressing trends affecting the transportation system such as more space to accommodate loading/unloading and package deliveries.
- Meeting future transportation, which is projected to increase, by adding more travel options.

East Central Area Plan- Neighborhood Planning Initiative (NPI)
Denver’s Neighborhood Planning Initiative is a long-term commitment to ensure every neighborhood in the city can enjoy the benefits of an area plan. Area plans cover a broad range of topics and establish a long-term vision that is catered to the specific needs of the individual neighborhoods.

How is NPI different from the Community Transportation Networks?
- The NPI is a broader long-range plan focused on housing, long-range mobility recommendations, land-use and urban design, and quality of life.
- Community networks are a short-range process to deliver near-term neighborhood transportation improvements.

What is the status of the East Central Neighborhood Plan?
- The East Central Neighborhood Plan is still in the public review phase. Neighborhoods included in this area are North Capitol Hill, Capitol Hill, City Park West, Cheesman Park, City Park, and Congress Park.
