S. Acoma Alley at Asbury Avenue
Storm Drain System

Overview
This location includes installation of one new storm drain inlet and 120 feet of new 18” storm pipe along the alley between S. Bannock Street and S. Acoma Street at W. Asbury Avenue. This storm sewer system will discharge into the existing storm sewer in W. Asbury Avenue.

The purpose of the project is to alleviate nuisance ponding in the alley during minor storm events.

The alley will be closed for the duration of the project, and there will be a partial closure of Asbury Avenue. Construction will begin in October, 2018 and last about three weeks. The contractor will coordinate access to adjacent businesses.

Location
Alley between S. Bannock Street and S. Acoma Street north of W. Asbury Avenue

Project Status
Construction

Project Type
Storm

Council District
7

Neighborhood
Overland

Estimated Cost
$2.9 M*
