Hampden Heights: S. Emporia Court at S. Dayton Street Storm Drain System

Overview
This location includes installation of five new storm drain inlets and a new 24" storm pipe along S. Emporia Court from Hampden Heights Trail to S. Dayton Street. This storm sewer system will discharge into the existing storm sewer in Hampden Heights Trail Park.

The purpose of the project is to minimize ponding in S. Dayton Street during minor storm events, which is causing safety concerns for both vehicular and pedestrian traffic. Construction will begin around November 28, 2018 and last about six weeks.

There will be partial road closures as the contractor works at the intersection of S. Emporia Court and S. Dayton Street. The contractor will coordinate access to the residences within the project limits.

Residences along S. Emporia Court may have temporary sanitary and water disruptions. Advance notice will be provided to the impacted residents.

Location(s)
S. Emporia Court – Hampden Heights Trail to S. Dayton Street

Project Status
Construction

Project Type
Storm

Council District
4

Neighborhood
Hampden Heights Civic Association

Estimated Cost
$2.9 M*
