S. Uinta Street & E. Lehigh Drive
Storm Drain System

Overview
This work location includes installation of three new storm drain inlets and a new 24" storm pipe along S. Uinta Street from Mansfield Avenue to E. Lehigh Drive. This storm sewer system will discharge into the existing storm sewer in Mansfield Avenue.

The purpose of the project is to minimize ponding in E. Lehigh Drive at S. Uinta Street during minor storm events, which is causing safety concerns for both vehicular and pedestrian traffic. Construction will begin around September 4, 2018 and last about four weeks.

Portions of S. Uinta Street and E. Lehigh Drive will be closed within the immediate project area. The contractor will coordinate access to the residences within the project limits.

Residences along S. Uinta Street may have temporary water disruptions. Advance notice will be provided to the impacted residents.

Location
S. Uinta Street from Mansfield Avenue to E. Lehigh Drive.
