CITY ISSUED PERMIT STICKER 1 PER SIDE

TEMPORARY SIGN

"SANDWICH BOARD"

CHAIN CONNECTING THE LEGS OF THE SIGN MUST BE PLACED 6" TO 12" ABOVE THE GROUND

SIGN ANCHOR 1 PER SIDE

30" Max.

24" Min.

36" Max.
**Temporary Sign Anchor Specifications**

For Concrete Surfaces

Public Works requires that signs be anchored to concrete using a steel drop-in anchor. The steel drop-in anchor is an all steel, machine bolt anchor available in carbon steel and two types of stainless steel.

![Diagram of INTERNAL THREADS and INTERNAL PLUG]

The steel drop-in is an internally threaded expansion anchor complete with a pre-assembled integral expander plug. The anchor is expanded with a matching setting tool designed to protect the internal threads while driving the pre-fitted plug to the end of the anchor. The tapered plug is precisely matched to the internal configuration of the anchor body to develop maximum expansion against the walls of the hole. Each steel anchor has 4 slots on the leading end, which allows it to expand. During installation, as the steel plug is driven into the bottom of the anchor, the steel shell is forced outward in four directions compressing against the walls of the anchor hole.

**Installation Procedures**

- Drill a hole into the concrete to the depth of embedment required. The tolerances of the drill bit should meet the requirements of ANSI Standard B272.75. Do not over-drill the hole. Blow the hole clean of dust and other material.

![Diagram of 3/8" DIAMETER]

Insert the anchor into the hole, and make the top flush with the surface. Using a power rawl setting tool, set the anchor by driving the tool into the anchor until the shoulder of the tool is sealed against the anchor.

**Anchoring Requirements**

Each sign is required to be anchored to the concrete and use a minimum of two anchors placed on each side. The minimum size anchor allowed is 1/4" diameter. The drill bit diameter associated with that anchor is 3/8" and a minimum depth of 1" must be drilled. All anchors must be placed flush with the surface as stated above. A butterfly / wing type screw with a fender washer that resists rusting must be used to anchor the sign. The Engineer must approve variations of this requirement.
Temporary Sign Anchor Specifications
For Landscape Surfaces

Public Works requires that signs be anchored to the landscape using a cork screw type pet stake or equivalent.

Installation Procedures

Rotate the pet stake flush with the landscape allowing only the top section of the stake to be visible. Attach a carabiner to the top section and to the sign.
Temporary Signs in the Right-of-Way Application
(Sandwich Boards or ‘H’ frame)

Completed applications may be submitted by mail, in person, email or fax.

Mail or drop off your completed application to:
Public Works Permit Operations
2000 W. 3rd Ave. Room 107
Denver CO, 80223
M-F 8AM – 4PM

Email your completed application in PDF format to: pwpermits@denvergov.org

Fax your completed application to: 303.446.3755

Please allow 15 business days to process your application.
