

**CITY AND COUNTY OF DENVER
DEPARTMENT OF TRANSPORTATION AND INFRASTRUCTURE**

**PROFESSIONAL ENGINEERING DESIGN SERVICES
FOR WEST COLFAX PEDESTRIAN AND TRANSIT IMPROVEMENTS PROJECT RFQ**

eBid Document No. 7235780

**Addendum #1
September 24, 2020**

Questions and Answers:

Q1: The 10%/concept proofing shows up in Section 5 and it is our understanding that the 10% concepts were completed under a previous effort. Since this is not listed under the schedule milestones or other Sections of the RFP, is there more detail on that work that can be provided?

A1: The 10% concept proofing as included in the scope was included in the text by error. Concept level 10% design for this project is completed and available in a CAD file. You may familiarize yourself with the concepts for the individual block segments by visiting the project website.

<https://www.denvergov.org/content/denvergov/en/transportation-infrastructure/programs-services/projects/west-colfax.html>

The selected firm will be expected to bring the bring the 10% concepts into an engineering level of design which includes survey, utilities, etc. as outlined in the scope.

Q2: The “track our current projects” link on the Elevate Denver Program History webpage is not working and an updated link is requested for access to and information on past and current projects.

A2: Please follow the link below to see Current Transportation & Infrastructure Projects.
