

Condition of Permit from DPR

Every person and/or organization holding a permit from Denver Parks and Recreation must comply with applicable Colorado Department of Public Health and Environment (CDPHE) [Public Health Orders](#) and [Guidelines](#) in effect at the time of the event.

COVID-19 Prevention: Tips for Permit Holder – Private Outdoor Fee-based Activities

In addition to the conditions of the permit and any other legal obligations that apply to the permitted activity, we ask that each permittee follow the guidance below.

Permit Holder

- Collect contact information for guests or attendees through ticket sales, reservations, RSVPs, or having sign-in sheets. Include times of arrival and departure, to help with potential exposure notification.
- Ensure 6 feet or more distance between all guests, attendees and vendors, unless they share a household. Give reminders to observe at least 6 feet social distance before, during, and after events.
- Implement symptom monitoring protocols for employees such as fitness instructors (including workplace temperature monitoring and symptom screening questions where possible) ([Additional Guidance](#)) and encourage sick employees to use the [CDPHE symptom support tool](#).
- Employees who have been in close contact with a person suspected or confirmed to have COVID-19 (generally within 6 feet for at least 15 minutes, depending on level of exposure) should not report to work and should self-quarantine.
- Employers should be familiar with the CDPHE Workplace Outbreak Guidance (available on the [Guidance & Resources page](#)) and apply all recommendations for prevention and mitigation that are outlined in that document to their operation.
- Provide contactless payment methods.
- Create a queue at entrances and exits that ensures a minimum of 6 feet of physical distance between individuals and pace entry and exit to prevent congestion.
- Clean up the area when your event is concluded. Make sure trash is placed in proper receptacles and the area is left in good condition for the next user.
- Do not exceed the permitted capacity for your event.
- Frequently clean and sanitize common touch points. If equipment is shared, make sure it is cleaned and disinfected after each use. ([CDC cleaning guidance](#)).
- Ensure that participants monitor for and do not participate if they have a fever or other COVID-19 symptoms.

Participants

- Do not share snacks or water, except in emergency situations.
- Masks should be worn in common areas and within 6 feet of others.
- Participants should maintain at least 6 feet of physical distance from others as much as possible.
- Encourage participants to stay home if sick or exhibiting COVID-19 symptoms. Consider screening participants for fever, symptoms, or exposures before or at their arrival.
- Encourage participants who have been in close contact with a person suspected or confirmed to have COVID-19 (generally within 6 feet for at least 15 minutes, depending on the level of exposure) to stay home and self-quarantine.
- [Populations at higher risk for severe COVID-19](#) should consider additional protections or staying home during this time per CDPHE guidance.
- Participants should refrain from mixing and mingling with others not in their household to the extent possible.

Wash your hands often

- [Wash your hands](#) often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, **use a hand sanitizer that contains at least 60% alcohol**. Cover all surfaces of your hands and rub them together until they feel dry.
- **Avoid touching your eyes, nose, and mouth** with unwashed hands.

Avoid close contact

- **Avoid close contact with people who are sick, even inside your home.** If possible, maintain 6 feet between the person who is sick and other household members.
- **Put distance between yourself and other people outside of your home.**
 - Remember that some people without symptoms may be able to spread virus.
 - [Stay at least 6 feet \(about 2 arms' length\) from other people.](#)
 - Keeping distance from others is especially important for [people who are at higher risk of getting very sick.](#)

Cover your mouth and nose with a cloth face cover when around others

- You could spread COVID-19 to others even if you do not feel sick.
- Everyone should wear a [cloth face cover](#) when they have to go out in public, for example to the grocery store or to pick up other necessities.
 - Cloth face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the mask without assistance.
- The cloth face cover is meant to protect other people in case you are infected.
- Do NOT use a facemask meant for a healthcare worker.
- Continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing.

Cover coughs and sneezes

- **If you are around others and do not have on your cloth face covering, remember to always cover your mouth and nose** with a tissue when you cough or sneeze or use the inside of your elbow and do not spit.
- **Throw used tissues** in the trash.
- Immediately **wash your hands** with soap and water for at least 20 seconds. If soap and water are not readily available, clean your hands with a hand sanitizer that contains at least 60% alcohol.

Clean and disinfect

- **Clean AND disinfect [frequently touched surfaces](#) daily.** This includes tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks.
- **If surfaces are dirty, clean them.** Use detergent or soap and water prior to disinfection.
- **Then, use a household disinfectant.** Most common [EPA-registered household disinfectants](#) will work.

Monitor Your Health

- **Be alert for symptoms.** Watch for fever, cough, shortness of breath, or [other symptoms of COVID-19](#).
 - Especially important if you are [running essential errands](#), going into the office or workplace, and in settings where it may be difficult to keep a [physical distance of 6 feet](#).
- **Take your temperature** if symptoms develop.
 - Don't take your temperature within 30 minutes of exercising or after taking medications that could lower your temperature, like acetaminophen.
- Follow [CDC guidance](#) if symptoms develop.

Please contact the Denver Department of Public Health and Environment at phicomments@denvergov.org with any questions.
