Bible Park Playground FAQs

What is this project?
Bible Park is a 66.15-acre park, encompassing several biking and walking trails, including the Highline Canal trail, a portion of the Goldsmith Gulch, numerous ballfields, tennis courts, exercise stations and, notably, a playground that is in need of replacement to meet changing needs for play value and safety. The project to redesign and replace the current playground includes concept design, design development and will conclude with the design being fully constructed for the park users to enjoy. You can find more information about the project on the Denver Parks and Recreation Park & Facility Projects webpage.

What’s the current status of the redesign, and what’s the process moving forward?
The redesign process kicked off in summer 2019, with concept design completed in March 2020. The project is currently going through construction documents and planned construction is anticipated to begin in winter 2021.

How is this project funded?
The Bible Park playground redesign and replacement project is funded by the Elevate Denver Bond Program, a 10-year, $937 million general obligation bond approved by voters in 2017 to enhance the City and County of Denver by providing critical citywide improvements to our roads and sidewalks, parks and playgrounds, libraries and museums. Funding is also provided through additional Capital Improvement Program (CIP) funding from Denver Parks and Recreation.
How has the community’s input been incorporated into this project?
Throughout the process of designing a new playground at Bible Park, Denver Parks and Recreation (DPR) proactively engaged the surrounding community to inform them of the project and solicit input on key playground features.

DPR held four community meetings and pop-up events that engaged stakeholders at key milestones throughout the design process (see schedule above for meetings). All meetings with a community input component were designed to engage all ages and had specific activities for children and adults. In addition, DPR deployed two community surveys that solicited input on design. Please visit the Park & Facility Projects webpage for a full community input summary with public meeting and survey results.

Where can I see the playground concept designs?
You can see the full playground concept design by visiting the Denver Parks and Recreation Park & Facility Projects webpage or clicking here to open the document directly.

I see the playground is getting moved to a new location within the park. What is going to happen to the existing playground?
The existing playground will be repurposed into a nature play area and bike/scoot area, which reflects both the community’s feedback as well as engineering and technical analysis.

How can I stay up-to-date on the project as it moves forward?
Updates will continue to be posted on the Park & Facility Projects webpage, and you can email the project team at parksandrecreation@denvergov.org with any questions you may have.
