THE PARK AT 29TH AND FAIRFAX

OPEN HOUSE MEETING #4

DATE: April 25, 2019

LOCATION: Stedman Elementary School Auditorium, 2940 Dexter Street, Denver, CO. 80207

TIME: 5:30 pm – 7:00 pm

PARTICIPANTS:
Denver Parks and Recreation (DPR) Staff: Jeru Parikh, and Laura Morales
Stakeholder Design Committee (SDC) Members: Moyra Stiles, and Leslie Twarogowski.
Logan Simpson Team: Michael Chalona, and Lisa Zoeller
Interpreter provided by Ad Verbum

MEETING SUMMARY OVERVIEW:

The meeting was a drop in, open house style, with no formal presentation. Attendees were free to visit whichever boards interested them most.

1. There was a single room for the project boards, a sign in table outside the room, and the welcome board at the entry.
   a. At the entry to the building, the welcome board was displayed in the hallway outside the meeting room.
   b. A sign in station was set up at the entry into the meeting room. Comment sheets were distributed to attendees.
      i. DPR staffed this station.
   c. The second station consisted of 11 boards. A summary of the boards are listed below.
      i. Aerial image of the neighborhood.
         1. Attendees stuck a colored pin into the board showing where they live. This allowed the team to gain an understanding of who attended and their proximity to the park site.
      ii. The definition of a pocket park, a location map, and a neighborhood boundary map.
      iii. A board with the timeline of the past processes and future steps for the project.
      iv. The board of the final survey results.
      v. A board that showed the architectural elevations of the adjacent development buildings.
vi. A parks element board with imagery of the play structures, shelters, and site furnishings.

vii. A plant material board showing images of suggested trees, shrubs, ornamental grasses, and perennials with leader arrows pointing to locations on a colored planting plan.

viii. There were two sets of final plan and perspective graphics boards. Rendered birds-eye top view of the 3D model was shown and labeled the key park elements. The second graphics board had two 3D perspective views into the park that demonstrated the character and spatial arrangement of the park design.

1. Logan Simpson and DPR staffed this area.

Tell us what YOU think: General comments, likes, dislikes, or other ideas!

1. Looks great! Love the colors and play ground!
   Only wish it was open sooner!
   Might even be good for fundraising events or something at that nature.

2. Great idea! Like the idea of having a small pump track along the sidewalk for kids or scooters.
   Also maybe a grassy area.
   We’re excited!

3. Like the idea of having a dog park.
   Like how it’s designed based on input.
   Like the landscaping. Very thought put into it!
   Good job!

4. As a long-time resident of Park Hill, I was present when King Soopers anchored the Dahlia Shopping Center. As I keep hearing Park Hill described as a food desert, I am concerned that there are plans for restaurants but nothing in the plans for a grocery. Perhaps one of the restaurants could be re-thought as a grocery store?

5. Please think seriously about putting in some kind of toilet.

6. [Handwritten comments]

Logan Simpson

It’s a great, well rounded design. I really like it. Great play structure and splash pad. The art wall can be a great opportunity for local artist to display their work. Having a good lighting design can help activate the space and also help with safety.

Great job!
