

Case Study Requirements

For a case study to be used and promoted by Energize Denver it must be fully and accurately given to the City with the following information. City staff will provide review, but will not write and develop content. The following information should be included:

Building Name

Building Address

Building Type

Building picture

ENERGY STAR score or EUI before the project:

List of efficiency measures completed (described such that a non-technical audience can understand them)

Cost of the project

Annual energy savings

Simple payback on energy savings.

Any non-energy benefits? Comfort? Lower maintenance costs?

Name of the company who implemented the project.

Quote from the building owner or manager stating why they undertook the project and why it is good for their bottom line. Permission from that individual to use their quote and name, title, company.
