

Is Your Home Safe from Radon?

What is radon?

Radon is a naturally occurring invisible gas that comes from the natural radioactive breakdown of uranium in soil, rock, and water.

1. Uranium decays and creates radium
2. Radium degas and creates radon gas

Radon can enter any home

Radon is drawn in through cracks and gaps in the foundation.

About 50% of homes in Colorado have high radon levels

Radon occurs naturally in soil

Due to the geology of Colorado, homes in our state have higher levels of radon than the national average.
